

# Astrata company profile

## ◆ WE'RE A DIGITAL QUALITY COMPANY

We make purpose-built, industry-leading HEDIS®-focused software for Health Plan Quality initiatives. **That's it.**

Our innovative, patented products dig deeply into your data – clinical and claims, structured and unstructured – using NLP, CQL and other technologies to mine insights that boost your quality rates and improve population health.

Our native FHIR/CQL digital measure engine is the first of its kind, built to support and accelerate the transition to Digital Quality.

## ◆ WE'RE FOCUSED ON THE FUTURE

Everything we build is aligned with CMS and NCQA's vision for the future of Digital Quality and value-based care. Our tools enable **transformation** – from a retrospective, reactive status quo to proactive, continuous quality improvement that can drive a learning health system.

## ◆ WE MAKE ROBUST ENTERPRISE SOFTWARE

Our teams have **decades of experience** in software, health care, and clinical NLP. Our HITRUST® certified solutions align with existing workflows and legacy processes. We partner with industry experts, regulatory organizations, health plans, and our customers to ensure our solutions and roadmap advance Digital Quality.

### CHART REVIEW

Lightning-fast NLP-assisted abstraction for real-time prospective HEDIS®.

### CONSTELLATION

A flexible text platform driving innovative uses of clinical data.

### eMEASURE

A HEDIS® engine built for the future of digital quality with FHIR and CQL.

### QUALITY NAVIGATOR

Real-time analytics for real life intervention and outreach support.

# Astrata's products cover every step on the path to Digital Quality

## WE GET RESULTS: A CHART REVIEW CASE STUDY

From June – December 2021, UPMC Health Plan used Astrata's Chart Review and a prospective process to close member gaps for the HEDIS® 2021 Measurement Year. The UPMC HP abstraction team reviewed gaps from 14 measures and sub-measures. UPMC HP analysts compared their individual and overall abstraction performance with and without Chart Review. Here's what they found:

### 30 GAPS PER HOUR

UPMC abstractors closed 30.3 gaps per hour on average in Chart Review.

### 7.6 X FASTER ABSTRACTION

UPMC abstractors found and closed gaps 7.6 times faster on average in Chart Review vs standard practice.

### 22.4K GAPS PER ABTRACTOR

One abstractor FTE can close ~22,400 open gaps in 6 months using Chart Review.

### \$2.5 MILLION SAVED

Chart Review can reduce abstraction costs by \$2.5 million on a 10-person, 6-month abstraction team.
